## Custom Trailers

We can design different configurations of trailers, including hydraulic tipper trailers, boxed trailers, flat deck trailers, generator trailers, scissor lift trailers, solar trailers, and many other variations.

We work with you to design something fit for purpose. Is it for business or personal use? What equipment will you be using? These are just some of the considerations we take into account when designing your custom trailer.

The Titan Engineering team is ready to talk to you about your trailer needs and how we can create custom designs that work for you.
